PROFESSIONAL SUMMARY

Senior Software Engineer with **6.5+ years** building and shipping production-grade **React Native (iOS & Android)** and **React.js web** applications in enterprise environments. Hands-on experience with both **React Native Old Architecture (Bridge-based)** and **New Architecture (JSI, Fabric, TurboModules)** — migrated and maintained apps across both paradigms. Strong track record translating UI/UX designs into **pixel-perfect, reusable, scalable components** aligned with enterprise design systems, and architecting solutions using **component-based architecture and modern state management** (Redux, Redux Toolkit, MobX, Zustand, Context API). Hands-on experience integrating **REST and GraphQL APIs** with secure authentication and data synchronization, optimizing performance (rendering efficiency, memory usage, load times), and bridging native **iOS (Swift/Objective-C) and Android (Kotlin/Java)** modules. Proven experience managing **CI/CD pipelines using Jenkins and Bitrise**, with end-to-end app release experience including **Apple App Store and Google Play Store** deployments. Experienced delivering end-to-end features collaborating with product managers, designers, backend engineers, and QA in cross-functional Agile teams.

TECHNICAL SKILLS

Mobile

React Native **iOS & Android** **TypeScript** **New Architecture (JSI / Fabric / TurboModules)** **Old Architecture (Bridge)**
React Navigation Native Bridging (Swift / Kotlin) Xcode / Android Studio

Web Frontend

React.js **JavaScript ES6+** **TypeScript** **HTML5** **CSS3** **Responsive UI**

State Management

Redux / Redux Toolkit **Zustand** **Context API** **MobX** **React Query** **Redux Thunk**

API & Data

RESTful APIs (Axios) **GraphQL** **Authentication & Authorization** **Data Synchronization** **Secure Storage** **OData**

Testing & Quality

Jest **Detox (E2E)** **Unit & Integration Testing** **Code Reviews** **Debugging & Profiling**

CI/CD & Release

Jenkins **Bitrise** **Apple App Store** **Google Play Store** **GitLab Pipelines** **Xcode Build**

Monitoring & Tools

Crashlytics **New Relic** **Firebase Analytics** **Git / GitHub / GitLab** **Jira / Asana** **Node.js**

PROFESSIONAL EXPERIENCE

Senior Software Engineer — TO THE NEW, Noida

Aug 2024 – Dec 2025

Stack: React Native, React.js, TypeScript, Redux Toolkit, REST, GraphQL, Jest, Jenkins, Bitrise, App Store, Google Play Store

- Developed and maintained **cross-platform iOS & Android applications** (React Native) and **React.js web applications** for enterprise clients including **Tata Play, Sony LIV, and Aramex** — delivering features across streaming, logistics, and e-commerce verticals.
- Translated **UI/UX designs into pixel-perfect, reusable, scalable components**, maintaining consistency with enterprise design systems across both mobile and web.
- Architected mobile and web solutions following **component-based architecture and state management patterns** using Redux Toolkit and Context API.
- Integrated **REST and GraphQL APIs**, handling authentication, error states, and data synchronization; implemented graceful network failure recovery via Axios interceptors.
- Worked across both **React Native Old Architecture (Bridge/NativeModules)** and **New Architecture (JSI, Fabric renderer, TurboModules)** — maintained legacy Bridge-based codebases and contributed to New Architecture migration for improved performance and lower bridge overhead.
- Bridged native **iOS (Swift/Objective-C) and Android (Java/Kotlin)** modules for capabilities not covered by existing React Native libraries.
- Wrote **unit, integration, and E2E tests using Jest and Detox**; debugged production issues and resolved defects to ensure application reliability.
- Managed **CI/CD pipelines using Jenkins and Bitrise**; handled end-to-end release processes including automated builds, code signing, and deployments to **Apple App Store and Google Play Store**.
- Optimized application performance by profiling bottlenecks, reducing load times, improving **rendering efficiency and minimizing memory usage**.
- Monitored production health with **Crashlytics and New Relic**; resolved critical crashes, memory leaks, and ANR/freeze issues.
- Performed **peer code reviews** and mentored junior developers on architecture, clean code principles, and Agile best practices.

Software Engineer — CarDekho Group, Gurugram

Mar 2022 – Apr 2024

Stack: React Native, React.js, TypeScript, Redux, GraphQL, REST APIs, Firebase, Jira

- Built **OTO Dealer and OTO SFA** — dealer management and lead management apps for South East Asia on React Native (iOS & Android), plus **React.js web features** for dealer operations and insurance platforms.
- Designed scalable solutions using **component-based architecture and modular design** across two related apps sharing a common component library.
- Integrated **RESTful and GraphQL APIs**, handling authentication, error states, and data synchronization between mobile, web, and backend services.
- Implemented **secure storage and authentication** for handling sensitive dealer and financial data in line with enterprise compliance standards.
- Worked with **native device capabilities** (Camera, GPS/Location) via native module integration on both iOS and

Android.

- Collaborated with QA on **device and OS compatibility testing** (Android v8-13, iOS v13-16); debugged and resolved production defects.
- Worked in Agile sprints alongside product, QA, and backend teams to estimate effort and deliver releases on time.

Software Engineer — NMG Technologies, Gurugram

Nov 2020 – Mar 2022

Stack: React Native, React.js, Redux, Redux Thunk, Firebase, REST APIs, AsyncStorage

- Built **Vouch** (social networking) and **Wealth Concert** (fintech fund management) — React Native apps and React.js web interfaces, published to App Store and Play Store.
- Used **RxJS Observables** to manage live social feed subscriptions and real-time financial transaction streams — combining, filtering, and debouncing event sources for reactive UX.
- Integrated **Firebase Authentication, FCM push notifications, Firebase Analytics**, and real-time data sync for live social feeds and financial transactions.
- Managed state with **Redux Thunk** for async flows across complex financial transaction screens; implemented social login (Google, Facebook) for streamlined onboarding.
- Connected REST APIs for user data, financial transactions, and social features; improved app performance and responsiveness across devices.

Software Engineer — Affle India, Gurugram

Apr 2019 – Oct 2020

Stack: React Native, React.js, Redux, Firebase, REST APIs

- Developed **Niine** (women's health tracking) and **Sunny E-Store** (e-commerce) — React Native apps and React.js web — for Android and iOS.
- Built product listing, cart, checkout, and **third-party payment integration**; implemented cycle tracking, reminders, and predictive health insights.
- Integrated **Firebase Authentication, push notifications**, and analytics; connected REST APIs for health data and order management.
- Profiled and optimized app performance — reduced startup time and scroll jank across mid-range Android devices.

KEY PROJECTS

Aramex — Logistics & Shipment Tracking Platform

TO THE NEW

Stack: React Native, React.js, TypeScript, Redux, React Query, Axios, Jenkins, Bitrise, Jest, Crashlytics, New Relic

- Large-scale enterprise logistics platform — cross-platform mobile (React Native) and web (React.js) with real-time shipment tracking and geolocation-based routing.
- Managed **Jenkins and Bitrise CI/CD pipelines** for automated builds and App Store / Play Store releases; wrote Jest unit tests and monitored production via New Relic.

DaMENSCH — Men's Apparel E-commerce

TO THE NEW

Stack: React Native, React.js, TypeScript, Redux Toolkit, GraphQL, Firebase, Detox, Crashlytics, New Relic

- Full e-commerce mobile and web platform — product listings, authentication, order management, and payment flows on iOS, Android, and web.
- Wrote **Detox E2E tests** for critical checkout flows; used Crashlytics and New Relic for real-time production monitoring.

Tata Play — DTH & Streaming Platform

TO THE NEW

Stack: React Native, React.js, TypeScript, Redux Toolkit, REST APIs, Firebase

- Worked on both the **React Native mobile app and React.js web platform** for Tata Play — one of India's largest DTH and streaming services.
- Built and maintained features across **user authentication & profile management, subscription flows, and content/streaming experiences** for millions of end users.
- Integrated payment gateways for subscription management; ensured secure authentication and smooth onboarding across mobile and web.

Sony LIV — OTT Streaming Platform

TO THE NEW

Stack: React Native, React.js, TypeScript, Redux Toolkit, REST APIs, Firebase

- Contributed to the **React Native mobile app and React.js web platform** for Sony LIV — a major OTT streaming platform with a large subscriber base.
- Developed features spanning **streaming/content discovery, user authentication & profiles, and subscription & payment flows**.
- Worked on performance optimisation for smooth video content rendering and seamless cross-platform user experience.

OTO Dealer & OTO SFA — Field Dealer Management

CarDekho Group

Stack: React Native, React.js, TypeScript, GraphQL, Camera, GPS, Firebase

- Dealer and lead management apps for South East Asia field teams — React Native mobile with Camera and GPS integration plus React.js web dashboards.
- Implemented secure authentication and data handling for sensitive dealer and lead records; deployed and maintained on both app stores.

EDUCATION

Bachelor of Technology, Computer Science

2013 – 2017

College of Engineering Roorkee
